Session Descriptions

Session: *A Dialogue Around Belonging and Student Success*

Presenter: Dr. Bernard Little

Session Description: Join faculty colleagues for a dialogue around belonging and students' success. Together we will explore how we can develop and nurture our teaching and learning spaces and communities to help students feel valued and connected, and how this sense of belonging supports students' well-being, academic engagement, and success.

Session: *Cultivating Collaboration Through Conversations*

Presenters: Lisa Giese, Andrea Montgomery, and Dr. Marjie Schoolfield

Session Description: To address the work-based learning component required for Programs of Study approval, Waubonsee Community College faculty developed a team-based challenge scenario for students in the Emergency Medical Technician-Basic, Certified Medical Assistant, and Registered Nursing Programs. We will share the details of our first (but not last!) Health Care Skills Event where our students in these programs worked to transition their "patient" from one department to the next. Join us to hear what worked well, what lessons were learned for next year, and what students thought about the experience. Information can be applied to develop team-based challenges in other CTE disciplines.

Session: *4 Connections: Key Practices for Engaging Students in the Classroom*

Presenters: Jeannie Anderson and Jenn Kelley

Session Description: The 4 Connections are simple practices that many faculty members already use to create a positive class climate. These practices provide students with a sense of belonging, encouragement, in-class retention, and improve student learning equitably.
